K., Passek, S., Frost, F. S., & Jette, A. M. (2015). Interrater reliability of AM-PAC "6-Clicks" basic mobility and daily activity short forms.

Activity Measure for Post Acute Care | RehabMeasures Database

The AM-PAC instrument examines a set of functional activities that are likely to be encountered by most adults during daily routines within the context of either an inpatient episode of care or outpatient post acute services.

Boston University Activity Measure for Post Acute Care ...

The short form of the AM-PAC Inpatient Short form, 6 Clicks, is a brief six question assessment of a patient's mobility and daily activity. Scores are used to help ensure the right patients are being seen by occupational and/or physical therapists in order to remain as mobile as their condition allows, and transition from the inpatient setting to the proper care, whether at home or in a Skilled Nursing Facility.
