The Best Description of Investment Fund Accounting There ...

A mutual fund is a portfolio of securities that is owned by many investors, where each investor owns shares in the portfolio. The fund is operated by money managers, who invest funds with the target of increasing the return to investors, either from income or capital gains. The exact type of investment strategy in which the money managers engage is based on the investment objectives stated in ...

Mutual fund — AccountingTools

As business events occur throughout the accounting period, journal entries are recorded in the general journal to show how the event changed in the accounting equation. For example, when the company spends cash to purchase a new vehicle, the cash account is decreased or credited and the vehicle account is increased or debited.

Journal Entries | Examples | Format | How to Explanation

Fund accounting is a system of accounting used by non-profit entities to tracking the amount of cash assigned to different purposes and the usage of that cash. The intent of fund accounting is not to track whether an entity has generated a profit, since this is not the purpose of a non-profit.
