The metadata is transferred to MG-RAST in a spreadsheet in which you can enter metadata for one or more samples along with information about the project the samples should be placed in. Step one in the first section, 'Prepare data', has the empty metadata spreadsheet template available for download with the required fields labeled in red. The metadata is hierarchical with three levels ...

MG-RAST user manual — MG-RAST documentation

For weight distribution calculation I like to use percent front axle/rear axle. Simplifying, we know that a weight placed directly over the front axle has a FA/RA distribution of 100% / 0%. Weight placed over the rear axle is 0/100. Wt exactly mid way between axles is 50/50. All other location
