Incorporating a pH-sensitive station and a photoactive recognition site in a [2]rotaxane provides access to a light-powered molecular machine that operates through a closed reaction network. Therein, a catalytic photoinduced proton transfer enables reversible ring shuttling, triggering autonomous dissipative operation. [View the article](#).

Journal of the American Chemical Society: List of issues

The Indian Chemical Society, a premier Scientific Society of India, was founded in 1924, as National Forum for the community of chemists and members of allied disciplines in the country. The driving force behind its establishment was the nationalistic spirit prevailing in India under British rule. J. N. Mukherjee, J.C. Ghosh and S.S. Bhatnagar while carrying out their research work in the ...
