I have a York Diamond 80 furnace about 6 years old or so. A few months back the blower motor stopped working. Someone came out and "hard wired" the blower motor so it would work, but was always on. Current problem: We just tried to use the furnace for the first time this year and it won't light. The LED blinks 4 times. Anyone know what this means?

The rollout switch (on the side of the burner box) is a manual reset switch and you reset it by pressing the button in the center. Six red flashes indicate a current failure on the modulating gas valve. Seven red flashes indicate the furnace has entered lockout mode because of no ignition.

York Furnace Error Codes | Hunker

I have a York Diamond 80 furnace, 12 yrs old, it will not stay running. The thermostat drops slowly and does not stay where it is set--seems the igniter starts, turns on the gas, but after a few mins shuts off. No heat, what can I do. I have replaced the thermostat to a new digital one, but that does not seem to fix the problem.
